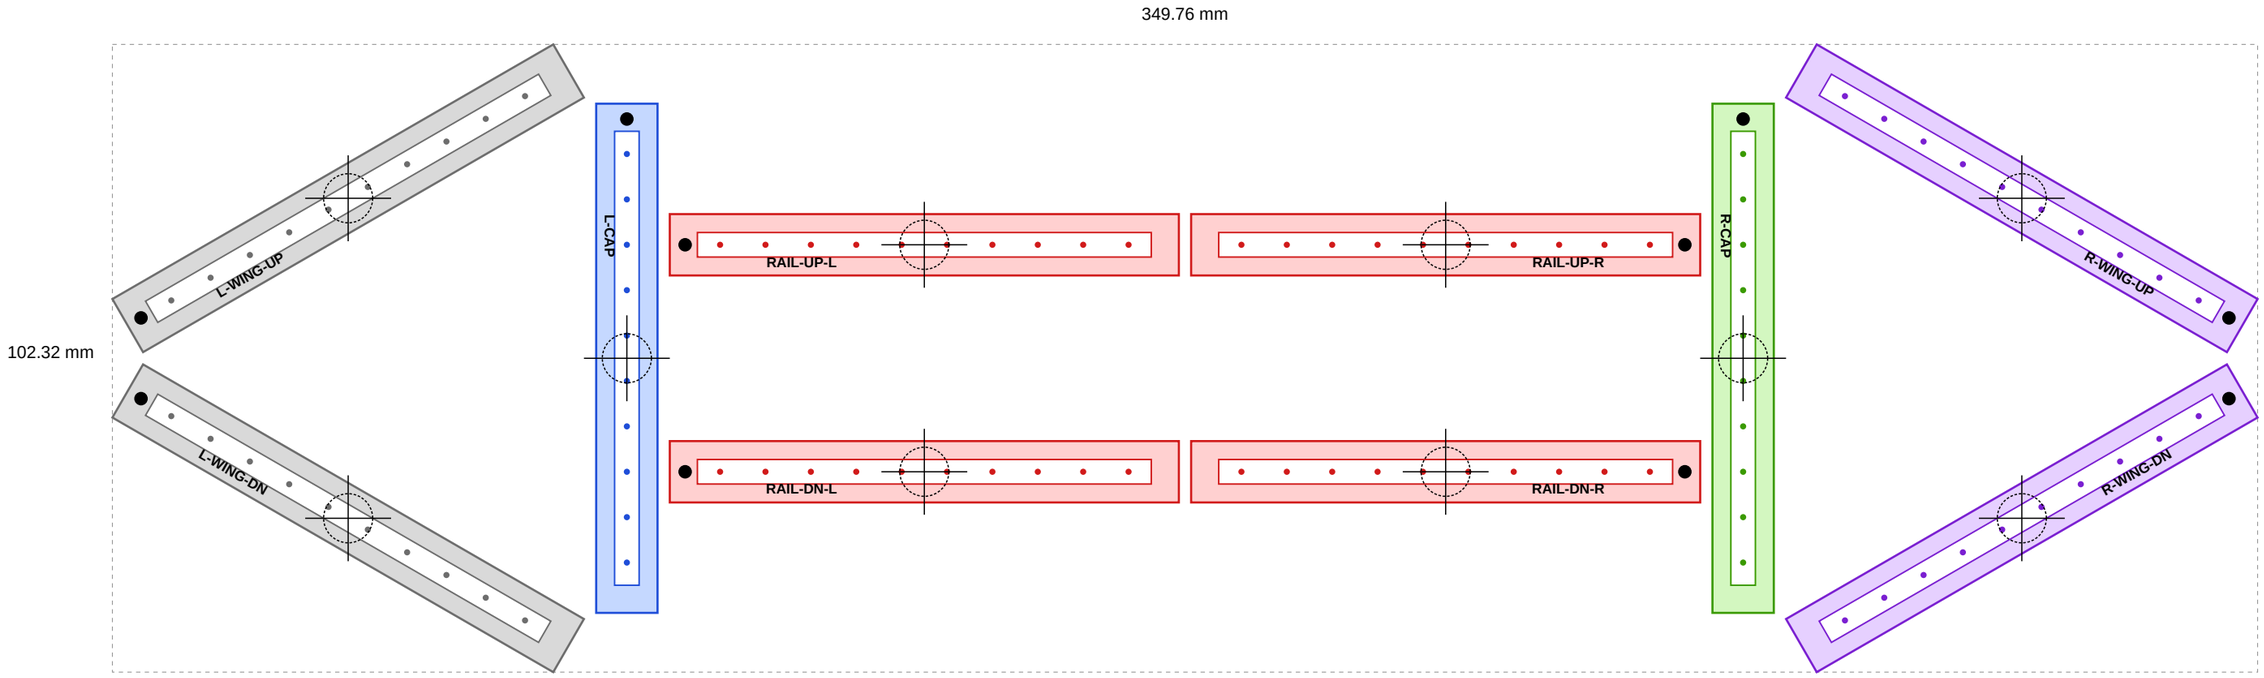
Stick arrow, drill template 1:1 (349.76 x 102.32 mm)

Print at 100 % (actual size, do NOT fit to page) and check that the scale bar below measures 100 mm.

Each stick: outer body 83 x 10 mm, LED window 74 x 4 mm, 2 mm free space between sticks.

Black dot = the ball of the stick (the round marker on its board). Mount each stick with its ball at the dot (left half: dots left, right half: dots right, caps: up).

Cross + dashed circle = middle of the stick = drill the cable hole (dia. 8 mm, check against your Grove connector) here.



Drilling positions: centre of each stick = centre of the cable hole (mm from the top-left corner of the arrow)

Stick	x	y	angle	Grove connector on the shield
