Casino sign - layout of the LED strips (to scale, dimensions in cm)

3 strips, 14 pieces, 164 LEDs (LED pitch 16.7 mm, 60 LEDs per metre) + the arrow: 10 Grove sticks of 10 LEDs + the CLOSED light: stick 11.

frameCcw
D10 - 53 LEDs - 2 pieces
left edge: 25 LEDs (#0-24)
bottom edge: 28 LEDs (#25-52)

letters
D11 - 58 LEDs - 10 pieces
one strip, one piece per letter,
joined in reading order (see table)

frameCw
D9 - 53 LEDs - 2 pieces
top edge: 28 LEDs (#0-27)
right edge: 25 LEDs (#28-52)

closedLight
stick 11, A3 - 10 white LEDs
Grove stick BEHIND the plate (real size, dashed): its 74 x 4 mm LED window lights the CLOSED hole text (about 10 x 2.5 cm) while the casino is closed; put frosted plastic between the stick and the hole

arrowSticks
10 Grove RGB LED sticks, 10 LEDs each
(shield connector; number as on the drawing)
1 L-CAP: D2
2 L-WING-UP: D3
3 L-WING-DN: D4
4 RAIL-UP-L: D5
5 RAIL-UP-R: D6
6 RAIL-DN-L: D7
7 RAIL-DN-R: D8
8 R-CAP: A0
9 R-WING-UP: A1
10 R-WING-DN: A2
dot = the ball of the stick, real size

● = first LED of the strip (DIN, index #0) —— = data direction inside a piece - - - - = wire jumper between pieces

Numbers next to the pieces and inside the letter circles are LED counts. #a-b are LED indexes in the sketch.
The gaps between strips are drawn only for clarity: on the real sign the strips touch each other.
A letter group may be laid out behind its letter in any shape; the circle is only an illustration.
